Re: Minco Sampling Techniques (UK) Ltd – REACH Status

Dear Sirs,

On December 18th 2006 the European Parliament & Council of the European Union adopted a regulation on chemical substances, Registration, Evaluation and Authorisation of Chemicals (REACH) EC No. 1907/2006. As a supplier to Minco UK Ltd, we need your help to comply with this regulation.

REACH provides a 'phase in' period, during which substances can be pre-registered by the manufacturer or importer of the substance. The period for pre-registration is 01/06/2006 to 30/11/2008. Substances that are not pre-registered during this period will be subject to the full registration process, and will lose the benefit of the phase-in period. To ensure compliance with the Regulation Minco UK Ltd requires that all substances supplied to the company either as a raw material or a compound or component to be registered, either by you or your up-stream suppliers as manufacturers or importers of the substance.

The purpose of the legislation is to ensure that chemicals are safely used and managed - As a supplier to Minco UK, you or your supplier must pre-register all substances sold to our company.

Please find attached a form confirming your intent for you or your suppliers to pre-register all substances in products sold to Minco UK Ltd. If you or your suppliers do not intend to pre-register a particular substance, you must advise us as soon as possible.

Meanwhile, if you have any question please do not hesitate to contact me.

Yours truly
Joe Waddicor – Technical Manager
